

# Appendix

## Multiple-Meaning Words in Mathematics

acute	inscribe	rational
altitude	intersection	ray
base	irrational	reflection
change	key	relative
chord	left	right
closed	mass	root
combination	mean	round
composite	median	ruler
coordinate	multiple	scale
count	negative	segment
degree	net	set
difference	obtuse	side
digit	odd	similar
edge	open	slide
even	operation	solution
expression	origin	space
face	period	sum
factor	plane	table
fair	plot	term
figure	point	times
foot	power	translation
formula	prime	union
function	product	unit
identity	proper	value
improper	property	volume
inequality	range	yard
